

# CRAFT BEER

## CRAFT BEER INDUSTRY PROFESSIONAL CERTIFICATE

### FROM GRAIN TO GLASS

Beginning fall 2022, students at EWU will be able to explore the complexities of the craft beer industry – from learning the essentials of brewing and service to gaining the experience needed to land jobs in industry.

The program aims to open doors for students close to home, as well as support the workforce needs of the craft beer community. The success of this program will rely on many factors, none more important than the support of that community.

We are looking for craft beer professionals who are interested in becoming some of the first to partner with Eastern's Craft Beer Industry Professional Certificate Program. The primary ways community members can get involved are:

- Guest lectures
- Facility tours and demonstrations
- Student practicums, internships, and/or jobs
- Fund raising collaborations
- Financial Contributions

To date, the community interest and response to the new program has been tremendous. We have received numerous inquiries about the program from current students, community professionals, veterans and folks just wanting to expand their craft beer knowledge. This speaks volumes for the potential of craft beer education to help meet and expand local and regional opportunities in the industry.

If you are interested in supporting in any way, or would like to receive more information, please contact us today!

Educating and enhancing the knowledge and practical skills of anyone interested in entering the **craft beer industry**.
