Quality ratings, such as AAA, refer to the credit risk of individual securities, and not to a fund, portfolio, or benchmark.

Mutual fund investment performance reflects fee waivers in effect. In the absence of fee waivers, total return would be lower. Total return is based on net change in NAV, assuming reinvestment of all distributions. Total return is annualized for periods greater than one year.

Effective 7/1/2019 Multi Advisor Fund ("MAF") performance returns are calculated gross of fund investment management fees and net of fund administrative expenses. For historical time frames, prior to 6/30/2019, Multi Advisor Fund ("MAF") returns were calculated net of both fund investment management fees and fund administrative expenses. Multiple year returns that include pre and post change time frames will reflect two different methodologies. Calculation of fund administrative expenses does not change and will continue to be reported on a net basis.

## IMPORTANT INFORMATION REGARDING MANAGER COMMENTARY

Past performance is not a guarantee of future results.

This information is obtained from sources believed to be reliable, its accuracy and completeness are not guaranteed, and is subject to change. This manager commentary is provided for informational purposes only and is not intended to be, and should not be construed as an offer, solicitation or recommendation with respect to any transaction and should not be treated as legal advice, investment advice or tax advice. Recipients should not rely upon this information as a substitute for obtaining specific legal or tax advice from their own professional legal or tax advisors.

Certain investment managers may utilize an environmental, social, and governance ("ESG") framework as a tool in their investment strategies. Considering ESG factors may result in reduced or increased exposure to certain companies or industries, which may cause the applicable strategy's performance to be lower than that of strategies that do not consider ESG factors. In addition, the added cost of ESG-related diligence in assessing the ESG parameters of an investment may also reduce the profitability of an applicable strategy's investments. There may also be different views of what it means for an issuer to have positive or negative ESG characteristics. There can be no guarantee that an investment manager's determinations regarding a company's ESG characteristics will be accurate, including whether any such ESG characteristics are financially material or immaterial; any such inaccuracies could adversely affect a strategy's performance.

Forward-looking statements and assumptions are the manager's current estimates or expectations of future events or future results based upon proprietary research and should not be construed as an estimate or promise of results that a portfolio may achieve. Actual results could differ materially from the results indicated by this information.
